

Q-Motion - Gen 2

Add Additional Remote Control to Blind

1. On the first remote already paired, press the UP button to send the blind to the full open position

2. Once at the top, press and HOLD the UP button. The blind will move 10% down then back up followed by 75% down. As the blind travels towards 75% closed position, release the UP button

3. When the blind has stopped moving, pull DOWN on the bottom bar more than 50mm

4. Press and HOLD the UP button on the new remote control to be paired for 8 seconds

5. Blind will move to the full open position and the second remote control is now paired
