

Enabling Apple HomeKit Quick Start Guide

## **Before You Begin:**

Apple HomeKit

In order to enable Apple® HomeKit™, you'll need:

- A PowerView® Hub, Gen 2, updated with the latest firmware
- A HomeKit setup code (located on the bottom of the PowerView Hub)
- An iPhone® or iPad® with the latest version of iOS
- The Apple Home app downloaded and installed on your iPhone or iPad

## Tips

Works with

- Use of the PowerView Remote to control PowerView shades integrated with Apple HomeKit is not recommended. For optimal system performance, the Apple Home app, PowerView® App and Scene Controller are the recommended control options
- Complete all Shade, Room and Scene configuration in the PowerView App prior to enabling HomeKit and using the Home app
- If any changes to Shade and/or Scene information are made in the Apple Home app, you may need to confirm those changes and resolve any conflicts the next time you open the PowerView App
- Once HomeKit is enabled, it is recommended that the user who added the PowerView Hub to their HomeKit home share access with family members using the Home app. This ensures everyone in the home can use Siri, and that all changes stay in sync

## Step 1

Open the PowerView App on your iPhone or iPad, access the menu and select HomeKit & Siri
