

Whisper Powerview

Soft Top Limit Setting

Q - I have multiple Whisper's in a row but when the blinds are in the UP position they don't line up?

A - You can now set a Soft Top Limit on the Whisper's. the Soft Top Limit must be more than 30mm away from the original top limit, by doing this you will be able to align all blinds!

Instructions

- ❑ Press and hold the manual control button on the blinds
- ❑ On the remote, deselect all channels. Ensure no channels are lit up
- ❑ With the manual control button on the blind pressed in, quickly press and release the OPEN button on the remote. The blind will JOG. Release the manual control button.
- ❑ Select the channel the blind is paired to on the remote, move the blind up or down to the new desired position. Ensure this position is at least 30mm away from the original position in order for a new Soft Top Limit to be set
- ❑ Once the blind is at the new position, press and hold the STOP button until the remote goes into programming mode
- ❑ On the remote, deselect all channels. Ensure no channels are lit up
- ❑ With the manual control button on the blind pressed in, quickly press and release the OPEN button on the remote. The blind will JOG indicating that it has saved the new Soft Top Limit.
- ❑ Release the manual control button
