

Roller Blinds & Sunscreens

Features & Benefits

Roller Blinds

FEATURE

Available in block out and light filtering fabrics

Block out fabric is particularly suitable for bedrooms, boardrooms and media room locations

Block out fabric will stop all of the UV, most of the heat and most of the light

Block out fabric can be combined with sunscreen fabric to form a dual roller system (note 100mm reveal depth is required)

The dual roller system offers controls at opposing ends or at the same end. Front roll and back roll options

Light filtering fabrics offer privacy whilst keeping the room light

3 Control options Spring, Chain and Automated

Chain tensioners are recommended where possible

Bottom rail options available are Round, Elliptical, Balance and Strata

BENEFIT

Gives privacy with filtered light or the option of light exclusion

Will darken these rooms considerably, suitable for daylight saving hours with youngsters or board rooms with visual displays.

Will keep the room cool, no glare with total privacy (no shadows or silhouettes)

This will give heat and UV protections during the day and privacy at night, all on a dual bracket system

Ease of use with no chain tangles with one control at each end or both at the same end for easy accessibility

The room loses very little light whilst maintaining privacy (day and night)

Different options to suit different budgets and client's needs

Child safe and easier operation of the chain control

Colours and styles to suit all decors and to co-ordinate with our large range of fabrics

Sunscreens

FEATURE

Suitable for windows and doors where there is abundant sunlight

They are suitable for Ranch sliders, Bi-folding Doors and picture windows up to 3000mm in width

Sunscreens give a minimalistic look to the interior, available in a large colour range

Sunscreens allow the control of heat and UV rays

Sunscreen fabrics feature an openness factor with an average of between 5 – 10%

Sunscreens can combine with Rolle Blinds to form a dual roller system

Silverscreen has an aluminium backing

BENEFIT

Will stop UV fade on furniture, carpet and wooden flooring

This means fewer blinds in large widths with less light gaps

This is the current fashion and can combine Nicely with drapes. Maintains your view (colour dependant. Black gives the best vision and white gives the best heat reflection)

Keeps the room cool and prevents fading of the furnishings

This allows the flow of light and Ventilation while reducing the impact of heat, glare and UV rays by up to 95%. The openness factor allows you to enjoy your views with the shade fully lowered and gives daytime privacy

This will give heat and UV protection during the day and privacy at night all on a dual bracket system

All colours keep the room cool due to the reflective aluminium backing and maximize your view through
